This report describes the performance of the typical student in this group compared to students in the same grade across the nation. The Battery scores provide an overall indication of this group's performance.

The score is reported with two numbers separated by a decimal. The number before the decimal indicates the grade year and the number after the decimal indicates the grade month. For example: if a test taker has a grade equivalent of 7.2, it means that a student earned a score equivalent to a typical student in the second month of seventh grade.
